

SERVICE BRIEF

Printer Management for SMBs

Reduce your printing costs and gain control over printer maintenance, ink and paper consumption, and document security.

Prevent Unnecessary Expenditures from Your Printers

Reduce your printing cost and improve efficiency.

How much does your organization spend on printing? Do you have the experience and knowledge to control this expenditure? Edit Technology Solutions' printer management service can help reduce your printing costs and improve your overall printing efficiency. By letting go of the reigns and allowing us to manage this critical asset, you can instead focus on your business.

Save and Manage Print Costs

Improve your business' bottom line.

Our printer management solution is built to optimize your print infrastructure so you can easily identify savings opportunities. When Edit Technology Solutions manages your print systems, we enforce rules for color output, duplex printing, and more. This helps to establish consistent, automatic savings costs through the use of permission-based print systems.

Keep Your Documents Safe

Prevent sensitive data from being exposed or stolen.

Edit Technology Solutions' Printer Management solution employs user authentication to ensure the security of every printer. Through user authentication, we are able to create an audit trail so you'll be able to see who prints what document when, and on which device. This helps to maximize security and prevent data leakage through your print mediums.

Go Green to Minimize Waste

Reduce your company's paper waste and carbon footprint

A print management solution can help reduce your company's paper waste by enforcing protocol that minimizes print to only what's needed. By using a print management solution, you will be able to enforce duplex printing, which will reduce your paper usage considerably.

Support your company's sustainability efforts with Edit Technology Solutions' Printer Management solution.

**Features**

- Printer Policy Management
- Significant Cost Reduction
- Managed Printer Maintenance and Support
- Warranty Management
